

# NEGEV PREVAILS

## Ben-Gurion University's Emergency Response

Ben-Gurion University of the Negev (BGU) is on the front lines of a country devastated by terror. Given its 22-mile proximity to the Gaza Envelope, BGU was disproportionately impacted by the atrocities that took place on October 7, 2023. In the aftermath, the University understands and embraces its role as the anchor institution in the Negev and as key to Israel's recovery and rebuilding for the future.

BGU relies on the support from the global philanthropic community to help it go from **strength to even greater strength** in the challenging months and years to come.
